U. S. COMMEMORATIVE HALF DOLLARS

NOTE: This offering is a most unique one, indeed. It is rare that a dealer has the Opportunity to offer "a one owner" collection of Commemorative Half Dollars. This collector purchased virtually all of the coins in this group DIRECT from their respective commissions and held them as part of his collection on their original shipping cards. Some of the following lots will be sold in the original containers. True, many of the coins have some tarnish, but all are STRICTLY UNCIRCULATED, and have not been handled for over 20 years. A rare opportunity to acquire, "original state" half dollars, uncleaned and not handled.

- 707 — **1898 'O' mint. Brilliant Uncirculated.** A "sleeper" rarity! If you have been collecting dollars for many years you are well aware of how seldom a genuine uncirculated coin of this date and mint appeared. It is this cataloguer's opinion that this coin is rarer than the 1893 'S' or 1903 'O' in this condition; altho the reference books indicate these two are rare. It presently lists for \$150.00 and it would not surprise us if it realized double that figure.

GOLD COINS OF THE WORLD

Complete from 600 A.D. to 1958

An illustrated standard catalogue with valuations

by Robert Friedberg

PRICE: \$15.00

A single large size **library volume** (8½"x11"), **about 400 pages, over 2500 coin illustrations**, and handsomely printed and bound with attractive jacket.

Never before in the annals of numismatics has a book of this magnitude and importance been attempted or published.

THE SCOPE OF THIS BOOK: A complete catalogue of all the gold coins struck in the world up to 1958 and beginning with the first distinctive national or local coinage of each coin-issuing locality that struck gold coins following the age of antiquity and nomadic invasion. In Europe the first such issues are the Italian Beneventum coins of about 600 A.D.; in the Orient, the Axum coins of Ethiopia of about 300 A.D.; in America, the Spanish colonial coins of about 1620. **Naturally, all types of U.S. coins have been shown.**

In order to attain the maximum accuracy needed for so important a work as this, a group of contributors has assisted the author in various ways. These contributors, both American and European are Numismatists of world-wide renown and are acknowledged experts in their fields. No other coin book has ever enjoyed the benefit or prestige of such collaboration.

All coins have been accurately described and collectors valuations given. The more than 2500 illustrations of these coins have been embodied within the text, rather than keeping them as a separate section of plates at the end of the book.

Five years of preparation have gone into this work, and veritable multitudes of numismatic reference works have been consulted in order to gather the necessary information to make this volume both accurate and complete. **It would require the purchase of books amounting to well over \$1000.00 to duplicate the numismatic information in this one volume.** As an example, the standard work on Danish coins alone sells for about \$30.00; on Spanish coins, it is about \$200.00; on Polish coins, it is about \$25.00, etc.

No one with the slightest interest in coin collecting, or for that matter in history, geography, economics, politics, or the ever popular subject of gold in general, can afford to be without this valuable and important work.

The indexes alone are worth the price of \$15.00. One of them, several pages long, shows the principal gold coins of the world, their weight, their purity and their original exchange value in terms of U.S. gold dollars—information long needed by the world and never before available.

The price of this remarkable book is \$15.00. Order your copy now to insure immediate delivery upon publication.

Just check the box on the bid sheet and be certain to be among the first to own this important book!
